WE GUARANTEE That all seeds sold by us shall prove to be as represented, to the extent that should they not do so, we will replace them, or send other seeds to the same value. But we cannot guarantee the crop any further than the above offer, as there are so many causes which operate unfavourably in the germination of seeds in a tropical climate, over which we have no control. Among the causes of which is one of the most important. The so may be in proper condition when the seed is planted, but the weather which follows may be too wet, which will cause the seed to rot: or it may be too hot and dry, which destroys the germ before it shows itself. The soil may also be un favourable for the variety of seed planted. And lastly, the seeds may be and are frequently destroyed by vermin of various kinds. Such occurrences are beyond the power of man to prevent and for which we cannot be responsible. Hongkong, 2nd September, 1589.

In one of the unofficial members of the Legislative Council were to call for the papers in connection with the recent Chinese Extradition case, the reply of the Go. TH. M.S. Merlin and a boat's crew of the Garrison, vernment would probably be that the request could not be complied with with due as to which will prove the winning crew. regard to the public interest. The true history of the case would, however, make very interesting and not unprofitable reading. The facts which have become public are that one night a party of Chinese soldiers from Hongkong on the 27th Julycrossed the border of British Kowloon and forcibly carried off two men. Subsequently a police guard was sent from Hongkong to Observatory, 11.35 inches as compared with 6.41 Canton to receive back the prisoners, for inches in the corresponding month of last year. whose rendition formal application was then | 96.25 inches as against 95.10 inches in the same made. Almost at as t, however, he was fortunate enough to strength of the battery. It is to be hoped that secure legal assistance, and to the able manner in which Mr. WILKIMSON crossexamined the witnesses for the prosecution the acquied probably ower his release. far as the evidence is concerned the case does not present any special points of interest; the charge was one of bighway robbery, and it broke down on the point of identification. It is the violation of British territory and the subsequent surrender of the captives by the Chinese authorities the invest it with special importance. We cannot rough for the accuracy of all we have heard in connection with the matter, but by the very nature of the case it was preguant their wheat crop in the spring, and ought to with the possibility of a grave diplomatic make them comfortable for the winter. A NEW JAPANESE RESORT. The sulphur springs of Unsen, in the neighbourhood of Nagauski, have been gradually growing into favour with Shanghai residents as a sanatorium during the hot weather, or as a convenient place to visit for a holiday, especially With those whose time is limited; and the at tractions to the spot were greatly increased when it was known that a hotel had been erected in foreign style, and that the proprietor offered board and lodging to visitors on moderate terms. where foreigners are located, rather than men four months. The mountain range of Ungen forms the centre of a peninsula lying due east of Nagasaki and in the prefecture of Shimabara, the isthmus connecting it with the Nagasaki district being ttle more than a mile wide in some places. The town of Shimabara, distant about forty miles from, Nagasaki, is the only town of any pretonsions in the district, and is situated at the extreme north of the peninsula, on the shores of the in August from England for a tonr through glican Mission is located. It is needless to gulf to which the town gives its name. Kuchinopeningula, and Obama, a small village on the seater place being twenty four miles from Nagasaki. There is an excellent line of broad and well graded roads all the way from Nagasaki and completely round the peninsula, but unfortunately these good roads have not been extended to Unzen, the mountain paths to that place being nar-

in, formerly Treasurer and, Acting Governor in row and in many places very rough. There are three routes by which Unsen may be reached from Nagasaki. One is by jinriksha to Chiji-wa, a village at the extreme north of the isthmus, and thence up the mountain roads Juzen. Another is by Jinriksha to Aba; seven miles from Nagasaki, thence by boat seventeen miles scross the bay to Obams, and by monutain read from that place to Unzen Or, finally, by read to Aba and by boat to Chiji-wa and thence by road, the journey by boat being a trifle longer if Chijiwa is selected as the landing place. At both Chiji wa and Ohama mountain Acque can be obtained at very moderate rates and have the merit being comfortable for foreigners to travel as they are of a different construction to those used in the north of Japan, which are so dreaded by all those who are unable to sit on their heals in the Japanese fashion. distance from Chiji-wa to Unzen is about seven ister to Tientsin, the Shih-pao says:—"People is a good broad road at an easy grade, but after that the ascent is much steeper and the road narrow and rough. It leads by a mountain stream which has to be crossed twice. lower crossing is easy, as it is furnished with solid fist stepping-stones well

of the water; but the upper crossing more difficult, as the stepping stones are rrogular shape and are nearly always under water: Above this crossing the degenerates into a raju-washed gully filled rough stones, and is very steep and trying; and the journey up to Union takes fully three nours. From Obame the distance is only six miles. Immediately after leaving the village the read rough and steep, and this continues for about two miles and a half, but after that becomes comparatively easy, and as Unsen is approached the road becomes level and pleasant and Unzen is easily reached in two hours and a half. Between kages and pack-horses there is very little differ ence in price, whether taken from Obsus or Chifi-wa, and if such means of progression are used it matters little which route is chosen; but for the pedestrian I would strongly. commend the choice of the Obama road. ifficulties of seconding the hill have to countered at the outset, when they can be more eadily overcome, and the latter part of journey affords a pleasant and easy walk, whereas if the Chiji-wa road is selected all this is reversed, and the pedestrian finds his greatest difficulties come when he is tired and less ready to meet them, and furthermore he has a longer distance to walk. But let it be distinctly understood that if walking of any kind is to be indulged in with any degree of comfort in the Unsen district the pedestrian should provide himself with stout

shooting boots, well studded with hob-neils. The expenses for the journey from Nagosaki to Unzen for a comple of pedestrians, with baggage via Aba and Obama or Chiji-wa, should not exceed four dollars if care is taken; and the wind is favourable the trip should be accomplished easily in eight or nine hours. If kages are used the expenses will be slightly increased the cost of a kage from Obama or Chiji-wa being from 80 cents to a dollar. I am sorry to say, however, that foreigners in Japan usually throw money away recklessly, and by exciting the oupidity of the natives raise the cost of travelling in the country to those who come after them. There is a good view to be obtained on either
